The sac is on Wednesday July 18 - first week back

- Characteristics of high, middle and low income countries
- Similarities and differences in health status and burden of disease in low, middle and high income countries, including Australia
- Factors that contribute to similarities and differences in health status and burden of disease, including access to safe water - sanitation - poverty - inequality and discrimination (race, religion, sex, sexual orientation and gender identity) and global distribution and marketing of tobacco, alcohol and processed foods

1. Explain how countries are classified according to the characteristics of economic, social and environment.
2. So then understand economic characteristics eg poverty levels, incomes, industries in the countries and trade
3. Also learn the social characteristics of gender equality, birth and population growth, levels of employment, levels of education, social security, health systems, access to technology, legal systems and whether the country has a history of colonisation.
4. Then understand the environmental differences related to access to safe water and sanitation, food security, housing, levels of CO2 emissions.
5. Understand the differences in life expectancy, child and adult mortality and morbidity and burden of disease (YLL/YLD) between low, middle and high income countries.
6. And finally understand the factors that contribute to the above differences - access to safe water and sanitation, poverty, inequality and discrimination, and finally the global distribution and marketing of tobacco, alcohol and processed foods

The Chapter has examples of sample questions and answers on page 334-339 - read through these pages and answer the practice questions provided.

Your chapter in the textbook has an excellent summary on page 339

And finally, the last page has a sample exam preparation question - complete this also.

Remember your electronic copy of your textbook has answers to all the questions in the chapter.
