Sociocultural Factors Affecting Health Status
Sociocultural Factors

Sociocultural factors help determine an individual’s or population’s health and wellbeing, and are considered to be anything related to the social and cultural conditions into which people are born, grow, live, work and age that work to raise or lower the health status experienced.

- Copy Figure 3.2 from the page 66 into your work books
- Place them on your own continuum from “most influential” to “least influential”
Sociocultural Factors

Watch the following clip and write a brief description of factors that influence health including:

- A brief description of what you saw
- Family and parenting
- Nature Vs Nurture
